Fractal Design Core 1000 Computer Case - Quiet PC

Limited airflow options- only 1x120mm option for intake and only 92mm for exhaust. Side fan mount may be restricted by other components such as the GPU. I feel that Fractal design could have offered the option of another 120mm in the front for intake, as there seems to be enough room. I would prefer a bottom mounted PSU.

LTWare: Review Of Fractal Design Core 1000

Then I read about the Fractal Design Core 1000, and it only comes with one fan, a single 120mm front one, and I thought it would be nice to have 3 white arctic fans, just to be safe. Is 3 fans too many? Will it help with the life of my components? Here's the list. PCPartPicker part list / Price breakdown by merchant

Fractal Design has changed the internal layout of the chassis quite a bit, deviating from the traditional functionality somewhat. We will see during the assembly process if this is a good or bad thing. Turning the CORE 1000 around, we can see that the mainboard tray is completely solid, with no opening to be able to reach the CPU cooler backplate.

Fractal Design CORE 1000 Review | TechPowerUp

I had first bought a Corsair Carbide case, but being for both ATX as well as the micro ATX keyboard I had, was a bit too big so I switched it for the Fractal Design Core 1000. Generally, this is a good case, with a big plus point being 3 areas to mount fans, and with an open mesh system with filters.
