### **Hanks Buffered Salt Solution**

A balanced salt solution (BSS) is a solution made to a physiological pH and isotonic salt concentration. Solutions most commonly include sodium, potassium, calcium, magnesium, and chloride. Balanced salt solutions are used for washing tissues and cells and are usually combined with other agents to treat the tissues and cells. They provide the cells with water and inorganic ions, while ...

To overcome these limitations, we have developed the Atmospheric SEM (ASEM), with an inverted electron microscope and directly correlative optical microscope (OM) (Nishiyama et al., 2010). In contrast to the basically closed environmental capsule, the sample holder of ASEM is a dish that is open to environment.

Dulbecco's modified Eagle's medium (DMEM): a modification of BME, containing 4-fold concentrations of the amino acids and vitamins found in BME, as well as additional supplementary components. The original formulation of DMEM contained 1000 mg/L of glucose, but has since been raised in some modifications to 4500 mg/L, giving the terms "low glucose" and "high glucose".
