Game design is the art of applying design and aesthetics to create a game for entertainment or for educational, exercise, or experimental purposes. Increasingly, elements and principles of game design are also applied to other interactions, in the form of gamification.. Game design creates goals, rules and challenges to define a board game, card game, dice game, casino game, role-playing game ...

Game design - Wikipedia

A PC game, also known as a computer game or personal computer game, is a video game played on a personal computer rather than a dedicated video game console or arcade machine. Its defining characteristics include: more diverse and user-determined gaming hardware and software; and generally greater capacity in input, processing, and video output.
