Intravenous Therapy For Prehospital Providers
Intravenous Therapy For Prehospital Providers

NAEMT’s Prehospital Trauma Life Support (PHTLS) is recognized around the world as the leading continuing education program for prehospital emergency trauma care.

Prehospital Trauma Life Support - INHS Health Training

Of the 272 total patients, 162 had pre-arrival notification (prehospital sepsis alerts) and 110 did not. The average age was 67 years old (SD17), with the prehospital sepsis alert group being statistically older (69 versus 64 years old, p = 0.024, see Table 1), and 49% of patients were female. Ninety-eight percent of all patients were admitted to the hospital and 41% were admitted to the ICU.

Prehospital sepsis alert notification decreases time to ...

In the United States, the licensing of prehospital emergency medical providers (emergency medical technicians (EMTs)) and oversight of emergency medical services are governed at the state level. Each state is free to add or subtract levels as each state sees fit.
