Machine Transcription And Dictation Text

Notably, Bell and Tainter developed wax-coated cardboard cylinders for their record cylinders, instead of Edison's cast iron cylinder, covered with a removable film of tinfoil (the actual recording medium, which was prone to damage during installation or removal. Tainter received a separate patent for a tube assembly machine to automatically produce the coiled cardboard tubes, which served as ...

Dictation machine - Wikipedia

An online app that reduces the pain of converting audio & video to text. Saves thousands of hours every month for journalists, lawyers, students and professional transcriptionists all over the world, including researchers in Antarctica.

Transcribe - transcription software for converting audio ...

Transcription in the linguistic sense is the systematic representation of language in written form. The source can either be utterances (speech or sign language) or preexisting text in another writing system.. Transcription should not be confused with translation, which means representing the meaning of a source language text in a target language (e.g. Los Angeles into City of Angels) or with ...

Antique Dictating Machines 1890. Thomas A. Edison invented the Phonograph, a machine that could record and reproduce the human voice using a tinfoil covered cylinder, in 1877. (See photograph to left.) The 1878 photograph to the right shows Edison with a phonograph. In 1878, Edison listed ten uses for the phonograph.

Antique Dictating Machines - Office

Semi-Professional: Also designed for regular and prolonged use but may or may not have the facility to automate the transfer of dictations via email. Does not have PIN code locking or file encryption. Suitable for: Small to medium sized businesses and certain medical professionals who may not need all the features of the Pro equipment but who still require a 'Proper' dictation machine rather ...

Philips - Business Dictation Limited

Researching what is “the best transcription software” can be a little overwhelming. There are a lot of different answers. A lot of companies promote a “free” software, but free in a very limited capacity. Also speech to text software comes up in search results, like Dragon Naturally Speaking, but that isn’t a transcription software.
