### **Math What Is The Product**

Product (mathematics) The order in which real or complex numbers are multiplied has no bearing on the product; this is known as the commutative law of multiplication. When matrices or members of various other associative algebras are multiplied, the product usually depends on the order of the factors.

### **Product (mathematics) - Wikipedia**

In mathematics, the term 'product' refers to the answer to a multiplication problem. This lesson will define the term in more detail and give some examples of how it is used. Then, there will be a quiz to test your understanding. Smarter Balanced Assessments - Math Grade 6: Test Prep & Practice / Math Courses.

### **What is the Product in Math? - Definition & Overview ...**

A product in math is defined as the answer of an equation in which two or more variables are multiplied. In other terms, a product is the answer to any multiplication problem. Keep Learning.

### **What Does "product" Mean in Math? | Reference.com**

Illustrated definition of Product: The answer when two or more values are multiplied together. Try dragging the numerals to the blue boxes...

### **Product Definition (Illustrated Mathematics Dictionary)**

Finding Products with Multiplication. A product is the answer that you get when you multiply numbers together. For instance, the product of two and three is six, because  $2 \times 3 = 6$ . Multiplication is just a fancy way of adding several numbers together.

### **How to Find the Product of A Math Problem**

Some common words have specific meanings in math. In mathematical terms, product means the number obtained by multiplying two numbers. Multiplication equations are typically written as:  $3 \times 4 = 12$ . In this case, 12 is the product of 3 times 4. You can also say that 12 is the product of 3 and 4.

### **What Does the Word Product Mean in Math? | Sciencing**

The product in math is the result of multiplying numbers together. For example,  $50 \times 3 = 150$ . The product is 150.

### **What does the math term 'product' mean - answers.com**

Product simply means 'multiply'. The product of 2 and 3 is simply a way of writing :  $2 \times 3$  .

### **The Definition of Product in Math - mathwarehouse.com**

Product - Definition with Examples. The result of two or more numbers when multiplied together.

### **What is Product? - Definition, Facts & Example - Splash Math**

Product and Multiple. When we multiply 2 numbers, the answer is called the product. The question "Find the product of 4 and 5" means "Find the answer to  $4 \times 5$ ". The product is also called a multiple of each of the 2 numbers that gives that product. Some examples:  $4 \times 5 = 20$ . Therefore, 20 is a multiple of 4. And 20 is also a multiple of 5.
