Why Our Brains Like Short-Term Goals - Entrepreneur
What the Internet is doing to our brains. For me, as for others, the Net is becoming a universal medium, the conduit for most of the information that flows through my eyes and ears and into my mind.

Is Google Making Us Stupid? - The Atlantic
Susan Greenfield, British neuroscientist, writer and member of the House of Lords, warns us that screen technology is having a significant impact on our malleable brains. It is causing our brains to change the way they function. She tells us that the human brain has evolved to its profound capacity due to its ability to learn and adapt to environment.

Shorter attention span: the impact of technology on our brains
Advanced brain imaging has revealed that the teenage brain has lots of plasticity, which means it can change, adapt and respond to its environment.

Think Learn Succeed | Book by Dr. Caroline Leaf
Bush Jr.'s Skeleton Closet. George Bush likes to present himself as a straight-talking, regular guy. But it's an act -- regular guys don't go to Andover Prep, Yale and Harvard Business School, and straight-talking guys don't pretend to be regular guys after growing up in one of the most privileged homes in world history.
