## **Real Data Strategies**

Operating as a digital business means being fast—whether it's responding to customer queries, getting products and services out the door, or reacting to a change in the market. Real-time analytics plays into this need for speed, and has become a key component of data management strategies. More ...

## **Real-time analytics seen as key for successful data ...**

Real-time data (RTD) is information that is delivered immediately after collection. There is no delay in the timeliness of the information provided. Real-time data is often used for navigation or tracking. Such data is usually processed using real-time computing although it can also be stored for later or off-line data analysis.. Real-time data is not the same as dynamic data.
