Stress Free Surgery A Self

Stress and Heart Disease. The relationship between stress, heart disease and sudden death has been recognized since antiquity. The incidence of heart attacks and sudden death have been shown to increase significantly following the acute stress of natural disasters like hurricanes, earthquakes and tsunamis and as a consequence of any severe stressor that evokes "fight or flight" responses.

Surgery is a medical specialty that uses operative manual and instrumental techniques on a patient to investigate or treat a pathological condition such as a disease or injury, to help improve bodily function or appearance or to repair unwanted ruptured areas.. The act of performing surgery may be called a "surgical procedure", "operation", or simply "surgery".

Surgery - Wikipedia

The good news is, by taking active steps to look after our health and wellbeing we can learn to reduce the impact of stress on our life by managing external pressures and developing our emotional resilience - the ability to adapt and bounce back during times of change and adversity.

Resilience: Emotional stress | Nuffield Health

Sex reassignment surgery (SRS), also known as gender reassignment surgery and several other names, is a surgical procedure (or procedures) by which a transgender person's physical appearance and function of their existing sexual characteristics are altered to resemble that socially associated with their identified gender.It is part of a treatment for gender dysphoria in transgender people.

Sex reassignment surgery - Wikipedia

Medical researchers aren't sure exactly how stress increases the risk of heart disease. Stress itself might be a risk factor, or it could be that high levels of stress make other risk factors (such as high cholesterol or high blood pressure) worse.For example, if you are under stress, your blood pressure

goes up, you may overeat, you may exercise less, and you may be more likely to smoke.
